## **American Traffic Solutions Sees Both Fleet Services and State and Local Government Solutions Growth in Q1 2014**

TEMPE, AZ –More than 30 municipalities, counties and school districts selected or continued with American Traffic Solutions (ATS) as their partner to improve traffic safety at intersections, along speed corridors, bus lanes and around stopped school buses in the first three months of 2014. In all, ATS State and Local Government Solutions (SLGS) signed new contracts, and renewed, extended or enacted agreements, adding up to more than 700 red-light, speed, bus lane and school bus stop arm safety cameras in 12 states. Additionally, ATS Fleet Services' Toll and Violation management solutions continue to grow as more Fleets and fleet management companies selected ATS as their partner for helping solve their toll and violation management challenges.

“ATS welcomes its new partners and is pleased that so many current customers continue to choose our company for their toll, violation management and traffic safety programs. We look forward to working with all of them to help achieve the traffic safety, mobility and compliance goals,” said ATS CEO James Tuton.

The new SLGS contracts are split between existing customers and new clients, and provide for both red-light, speed, bus lane and school bus safety cameras. Osceola County and Lauderdale Lakes, both in Florida, as well as Georgetown Independent School District in Texas represent the local governments implementing ATS programs for the first time. Longtime clients New York City, Mesa, Arizona, Creve Coeur, Missouri, and Commerce City, Colorado, along with Athens-Clarke County all agreed to new contracts with ATS.

Lufkin, Texas, and Miami Gardens, Florida, all extended their programs for five years. Other locations that renewed or extended their agreements include: Davis, CA; Boulder, CO; Surfside, FL; St. John and Florissant, MO; Wilmington, NC; Linden, NJ; Knoxville and Murfreesboro, TN; Irving, TX; Roswell and Gwinnett County, GA. In Maryland, Charles County, Greenbelt, Howard County, Landover Hills, Morningside, Prince George's County and Westminster continued their partnership with ATS. Additionally, Cheverly, MD contracted to implement ATS' school zone safety solution.

### ***About American Traffic Solutions:***

***American Traffic Solutions (ATS) is proud to be North America's market leader in road safety camera installations, with more than 3,200 installed red-light, speed and school bus stop arm safety cameras serving more than 275 municipalities. ATS is also a leading provider of fleet toll and violation management solutions in North America. Working with some of North America's largest fleet management and rental car companies, ATS Fleet Services is the leading provider of toll and violation management solutions in the US and Canada.
